

# Alpha Dog creations

3D: providing that extra edge

## Alpha Dog Creations produces 3D graphics for your company's advertising and marketing solutions.

### Differentiation

We will give your designs the extra dimension, making them stand out from your competitors'.

While other companies are limited to proposing 2D or faux 3D solutions, your designs will be free to anything imaginable. Whether it is a company logo shaking hands with the CEO or the client's product re-created out of water, we will make it look exciting and real.

Used in conjunction with your layouts and graphic elements, Alpha Dog Creations' true three-dimensional graphics can give your company the competitive edge on the bid.

### Increased Opportunity

With 3D graphics and animation, your company can provide a broader range of services and obtain more projects.

Only the larger advertising and marketing companies employ in-house 3D artists. This allows them to secure additional projects smaller firms are unable to bid on. Augmenting your company's internal graphics capabilities with Alpha Dog Creation's skills will enable you to acquire 3D dominated projects and penetrate more markets.
